Awarded to:

Doug Leitch | ARMTEC

Photograph Title:

“Lighting Starts in the Tunnel”

Location:

Bowmanville, ON

Cold War relic beneath your feet

About three metres below where you are standing are the remains of an early 1960s era nuclear fallout bunker.

Interior of the bunker, showing the narrow corridor and equipment.

This bunker was part of a network of sites built by the Canadian government in western and central Canada to provide shelter in the event of a nuclear war. The bunkers were built in a hurry, and many of the smaller ones were closed at locations across the country.

The small ones were to be equipped with radiation detectors, food stores, and two staff, along with a business supply of food and water.

Although some 1,000 units had been built across Canada, the government to equip them wasn't available and the project was shelved in 1963.

Imagine what it might have been like if you had to live underground for a year, knowing that the world above you was being bombed.

A view of a bunker, built in 1963.
